Profile

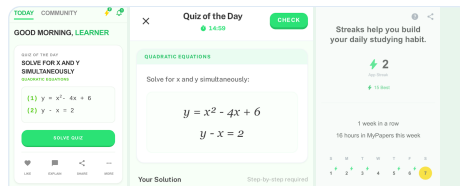

FULL STACK · MOBILE · AI

Software Engineer with hands-on experience building enterprise management systems, full-stack web platforms, and AI-powered tools. Currently developing scalable software at **MDIHUB** while building **MyPapers** — a startup improving mathematics outcomes for high school learners in South Africa.

EXPERIENCE

- Full Stack Developer — MDIHUB** Oct 2025 – Present
 - Launched **devpluxe.co.za** — scalable hackathon management platform supporting end-to-end event execution
 - Architected RBAC system with tailored dashboards for participants, mentors, judges & admins
 - Integrated 2FA across all account access points
- Software Developer Intern — Afrosurance** Jul 2024 – Aug 2025
 - Built SEO-optimized web app to streamline client onboarding for funeral insurance products
 - Designed custom CRM portal with secure authentication for targeted market segments
 - Integrated Notion API into admin dashboard for real-time application tracking

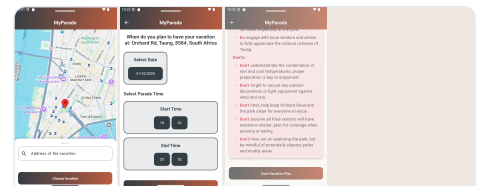

PROJECTS

MyPapers Startup

AI-powered math study platform for SA high school students. AI problem solver, quizzes & streaks.

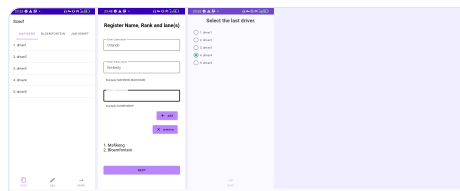

proxstudios.co.za

MyParade Flutter

NASA Space Apps Challenge. NASA meteorological data + AI to plan trips by historical weather.

NASA Space Apps · 2025

Skoff Android
